PROJECTS

Live Weather App - [LINK](#)

- Developed a live weather app using React.js, integrated with the OpenWeather API to display real-time weather information.
- Designed the user interface, implemented API calls for real-time data retrieval, and ensured responsive design for various devices.

Coffee Shop E-commerce Website - [LINK](#)

- Developed a dynamic coffee shop website using React and Tailwind CSS, featuring responsive design and intuitive user experience.
- Implemented a fully functional frontend cart system using React's Context Hook for efficient state management and seamless user interaction.

Hearing Loss Prediction using Machine Learning

- Predicted hearing loss using machine learning techniques in Anaconda, focusing on data analysis and model development.
- Collected and preprocessed data, built and trained machine learning models, and evaluated model performance to ensure accurate predictions.
